August 1, 2009

The Honorable Charlie Crist  
Governor  
The Capitol Building  
Tallahassee, Florida 32399

Dear Governor Crist:

The Florida Association of District Instructional Materials Administrators (FADIMA) is pleased to provide the 2010-2011 *Instructional Materials Cost Analysis* for your review. The purpose of this document is to assist you and others responsible for funding instructional materials in making informed financial decisions.

This year's Cost Analysis reflects the impact of mathematics and reading instruction as a priority in Florida. The adoption of mathematics includes text and digital resources as well as manipulatives for K-8 to address the Next Generation Sunshine State Standards. The reading materials include not only core, but also intervention reading materials. This comprehensive analysis includes:

- An explanation of the reasoning involved in determining cost data for each grade.
- The definition of terms used in the cost analysis.
- An explanation of the ratios used in the cost analysis.
- Figures that are consistent with the legislative intent passed in 2000 to provide every student with instructional materials in core subjects.
- Specific information regarding the costs of Dual Enrollment.

The FADIMA Board of Directors and members of the association that participated in compiling this document are available to respond to any questions that you may have. If you should have any questions or require additional information in regard to this cost analysis, please do not hesitate to contact me at 386-255-6475 ext. 38384 or by email at [ggrafton@volusia.k12.fl.us](mailto:ggrafton@volusia.k12.fl.us).

Sincerely,

***Cookie Grafton***

Cookie Grafton  
President

cc: The Honorable President of the Senate  
The Honorable Speaker of the House of Representatives  
Commissioner of Education  
FADIMA Board and Members

**FLORIDA ASSOCIATION OF DISTRICT  
INSTRUCTIONAL MATERIALS ADMINISTRATORS  
COST ANALYSIS FOR FY 2010-2011**

The Florida Association of District Instructional Materials Administrators (FADIMA) commends the Governor and the Legislature for continuing to provide funding for K-12 instructional materials, especially under difficult economic circumstances. The 2000 Legislature enacted statutory language addressing the need for current instructional materials, including instructional materials for each child in the core subject areas. This legislation further reinforces the need for the FADIMA Cost Analysis and a funding request that meets the requirements of law.

This analysis serves to identify a typical curriculum that a student would follow, with materials being selected as representative of the tools that may be used to teach that curriculum. FADIMA fully recognizes that many students may follow different curricula, that many educators may make different choices of materials, and that many needed instructional materials are not even reflected in the Cost Analysis calculations. The value of the Cost Analysis is that it reflects true costs associated with a mainstream curriculum, impacted by the *Next Generation Sunshine State Standards, No Child Left Behind, Class Size Reduction, the A++ Plan* and other state priorities. The materials and prices used to compile this cost analysis are representative of those used in districts throughout Florida and reflect actual cost.

FADIMA continues to include dual enrollment materials and commends the Legislature for including the funding in the appropriation. Dual enrollment is an excellent opportunity for high school students to simultaneously earn college or vocational credit toward a post-secondary diploma, certificate, or degree. Due to the efforts made by the State of Florida to provide this opportunity to our students and to the secondary school redesign initiative, the number of students participating in dual enrollment courses continues to rise, resulting in increasing costs to districts. The 2010-2011 dual enrollment request is based on an updated survey of the actual costs from districts throughout the state.

The Cost Analysis does not factor nor take into account costs for the following:

1. There is no specific line item for lost and damaged books which are estimated to exceed 5% per year. There is limited accommodation for lost and damaged instructional materials because the life cycle of the textbook is 1 year shorter than the adoption cycle. For example, the typical 6-year adoption cycle is amortized over 5 years.
2. There is no direct reference to the impact of a district's use of flexibility funds in this cost analysis. Florida Statutes provide considerable flexibility to districts when purchasing instructional materials that are not on the state adopted list, as well as, for use in the operating budget after March 1, 2010.
3. While overall district growth is funded and is one of the strengths of the instructional materials allocation, internal growth (from grade level to grade level) is not funded. For example, a school district with no total growth may have a "bubble" of students at one grade level and each year have to pay for additional materials not funded in the state allocation. Such a "bubble" may be produced through implementation of a legislative requirement such as mandatory 3<sup>rd</sup> grade retention.

4. No provision is made for the average of 1 to 3% statewide shipping for state adopted materials. The shipping cost for instructional materials purchased directly from the publisher with flexible funds is even a higher percentage (approximately 7-10%).
5. Teacher materials for Exceptional Student Education and Limited English Proficiency accommodations are not reflected.
6. No reference is made for ongoing maintenance costs associated with electronic courseware agreements.

Research indicates that 90 to 95 percent of classroom instruction and homework is delivered using instructional materials. For purposes of state adoption, "instructional materials" means:

...items having intellectual content that by design serves as a major tool for assisting in the instruction of a subject or course. These items may be available in bound, unbound, kit, or package form and may consist of hard backed or soft backed textbooks, consumables, learning laboratories, manipulatives, electronic media, and computer courseware or software. The term does not include electronic or computer hardware even if such hardware is bundled with software or other electronic media, nor does it include equipment or supplies. 1006.29(4), Florida Statutes

The following issues serve as the basis for the 2010-2011 funding request:

- Commitment to Next Generation Sunshine State Standards as the decisive factor for textbook adoption in Florida.
- An estimated .7% decrease in student enrollment figures.
- Statutory requirement to provide instructional materials for each child in the core subject areas. [1006.28(1), Florida Statutes]
- Statutory requirement to provide mathematics diagnostic assessment and remediation for students scoring at Levels I or II on the FCAT. 1006.28(1); 1003.4156(5)(c); 1003.428(2)(b2d), Florida Statutes
- Statutory requirements to provide reading intervention for students scoring at Levels I or II on the FCAT. [1008.25(4)(a); 1003.4156(1)(b); 1003.428(2)(b2c) Florida Statutes]
- Advancements in instructional materials with technology and digital resources as an integral part of all subject areas.

In addition to instructional materials, FADIMA supports separate appropriations for library media materials and hardware for use with technology based materials outside of the instructional materials appropriation.

FADIMA is pleased that education policymakers continue to consider this analysis in determining the state's instructional materials needs. In conducting this analysis, FADIMA used the Office of Economic and Demographic Research's projected enrollment figures from May 2009, and the current prices of materials. Adequately funding instructional materials supports highest student achievement and stresses an educational environment conducive to teaching and learning using Florida-specific,

standards-based materials reflective of research-based practices. FADIMA has conducted this analysis to provide education policymakers with a basis to determine the level of funding necessary to provide adequate instructional materials for Florida students. Schools are accountable for providing full implementation of instructional materials in the core subject areas, as well as providing intervention instructional materials for students who score at Level 1 and Level 2 on FCAT Mathematics and Reading. It is, therefore, essential that sufficient funding for instructional materials is provided.

- **For the 2010-2011 school year, FADIMA estimates the cost of instructional materials to adequately provide for K-12 public school students to be \$260,634,653.**
- **Additionally, the funding for instructional materials for students who participate in dual enrollment has been calculated at \$6,301,124.**
- **The total estimated amount to adequately fund instructional materials pursuant to legislative requirement is \$266,935,777.**

The appropriation for instructional materials is allocated to the districts by the need to equip new students (growth) and to maintain existing or returning students (maintenance). After the growth and maintenance costs are identified, they are applied to the estimated student population. The cost analysis is a projection based on figures available May 2009, and therefore may change based on subsequent projections from the Office of Economic and Demographic Research.

The Legislature requires funding for instructional materials for growth before maintenance. To determine student enrollment growth, the projected enrollment for FY 2009-2010 (the current fiscal year) is subtracted from the projected enrollment for FY 2010-2011 (the fiscal year for which the cost analysis is intended). The balance of the projected enrollment in FY 2009-2010 (after growth) is included in the formula for maintenance.

The cost for each grade is combined to provide the Governor, Legislative Leadership and the Commissioner of Education with the recommended projected costs to adequately fund instructional materials in FY 2010-2011.

**FADIMA COST ANALYSIS  
FY 2010-2011  
COMMITTEE CONSIDERATIONS**

Prior to finalization of cost data, the Cost Analysis Committee deliberated issues impacting the cost of materials. The following considerations were discussed and their impact factored into the analysis.

**Grades K-12: The Cost Analysis Committee**

- Modified the item descriptions for the core courses from 'text' to 'text/digital resources' to reflect that intellectual content is being provided online and digitally, as well as, the traditional textbook format.
- Added maps and globes to support the standards reflected in the Next Generation Sunshine State Standards

**Grades K-5: The Cost Analysis Committee**

- Chose a Scott Foresman product, enVisionMATH mathematics program and classroom manipulative kit at each grade level to reflect the new material submitted for the adoption in 2009-2010.
- Added mathematics classroom manipulative kits to fully support changes in the Next Generation Sunshine State Standards for mathematics instruction.
- Changed the science equipment kit ratio from 1:22 to 1:30 to accommodate sharing between classes because of the high cost of the kits.
- Removed the classroom libraries in reading because they are now included when a class set of student books is purchased.
- Removed the supplemental reading phonics book in K-3 due to phonics being covered in the comprehensive core reading program.
- Added Voyager intervention reading at K to be consistent with the grades 1-5.
- Changed to the Scott Foresman Music student text from the Big Book at grade 1 to accurately reflect actual purchases.

**Grades 6-8: The Cost Analysis Committee**

- Chose a Glencoe/McGraw-Hill Florida Math Connects, Course 1, 2, and 3 program and classroom manipulative kits at each grade level to reflect the new material submitted for the adoption in 2009-2010.
- Added mathematics classroom manipulative kits to fully support changes in the Next Generation Sunshine State Standards for mathematics instruction.
- Removed supplemental reading as consensus that reading funds are used for this purchase.

**Grades 9-12: The Cost Analysis Committee**

- Chose a mixture of Prentice Hall and Glencoe/McGraw-Hill mathematics programs to reflect the new material submitted for the adoption in 2009-2010.
- Removed supplemental reading as consensus that reading funds are used for this purchase.

## EXPLANATION OF THE FADIMA COST ANALYSIS

The FADIMA Cost Analysis Committee analyzes every grade level in order to project the cost of instructional materials definitively.

The committee identifies a typical curriculum or courses that districts offer. Once the typical curriculum is identified, state-adopted instructional materials that could be used to teach that curriculum are selected for the cost analysis. Materials selected are representative of those used in districts throughout Florida and reflect actual cost.

Listed below is an explanation of the terms used in the cost analysis:

- 📖 **SUBJECT** - The curriculum area taught.
- 📖 **ITEM** - The type of material used; for example, textbook, kit, technology, etc.
- 📖 **PUBLISHER** - The publisher of the specific title.
- 📖 **CODE** - The specific code number from the catalog of state-adopted materials.
- 📖 **RATIO** - The ratio explains how a title will be used in the classroom and identifies the mathematical ratio used to determine the cost of that title. All ratios are explained on the grade level page where they are used.
- 📖 **PRICE** - The source of the price is normally the Department of Education (state contract price). For titles that will be adopted after the cost analysis has been prepared, the publisher's bid price is used.
- 📖 **NON-CONSUMABLE** - Textbooks and other materials that are used year after year are included in the cost analysis by an amount that is amortized over the life of the adoption cycle.
- 📖 **YEARS** - The number of years to amortize the cost of non-consumable titles.
- 📖 **CONSUMABLE** - The one-year cost of consumable titles. These items must be purchased annually. The consumable cost is usually the price of the title unless the material is used with less than the total number of students.
- 📖 **ANNUAL NON-CONSUMABLE** - The sum of the one-year prices for all textbooks or materials used year after year.
- 📖 **ANNUAL CONSUMABLE** - The sum of the one-year prices for all consumable titles.
- 📖 **MAINTENANCE** - The sum of the annual non-consumable and annual consumable amounts. Maintenance is the amount needed to purchase material for returning students.
- 📖 **GROWTH** - The amount needed by each district to purchase a full set of materials for each new student. This cost differs from the non-consumable amount since it is not divided by the five years (amortized). It is the sum of the actual prices or the prices divided by the ratio.

- A 1:1 ratio is used for a textbook, workbook or other material that is used by one student.
- A 1:3 ratio reflects staggered purchases as funds are available. (Dictionaries).
- A 1:7 ratio is used to reflect a classroom set. (125 students per grade divided by 18 per class).
- A 1:8 ratio is used to reflect 25% of students taking a course. The student kit is buy one get one free.
- A 1:18 ratio at grades K-3 is used for materials that serve the complete classroom.
- A 1:30 ratio is a pre-packaged class set to be shared by multiple classes. (1 copy for each student).
- A 1:72 ratio is used to reflect a classroom set (18) of materials shared by 25% of the students taking a course. (18 divided by .25 (25% of the students) equals 72).
- A 1:125 ratio is used at the elementary level for materials that serve an entire school.
